Reviews of John Malone's work

John is: one of the **best marketing minds** I have come across in my career and would be a valuable asset for anyone looking to expand their market presence and grow their business

John has: the valuable combination of **big picture creativity and detail oriented execution**. He is highly sensitive to other functions in the organization, which enhances his profile and effectiveness.

I was **instantly impressed by his knowledge, energy and ability to size up key issues quickly**. I was looking for a consulting partner who could go beyond the the social media tactics and really talk marketing and business strategy with a new client.

John's **understanding of what companies need at** different stages of growth was invaluable. He could always back up his recommendations with detailed analysis and best practices.
